Synexsys Inventory LITE With Serial Key [March-2022]

Thanks to an innovative approach, Synexsys LITE is able to detect and capture entities from your PCs leaving inventory. In this case, we install a small application on your PCs, and the Synexsys Inventory solution is able to collect, index and report the data stored in the applications and databases available on the target systems. Synexsys Inventory LITE comes with a user-friendly wizard, and you can exploit an easy and effective approach for data management. Also it is possible to collect data stored in EDBs and start collections in a few seconds. Once we detected the target systems, we can start the inventory process by just enabling the collect mode. Also we can control the quantities of collected data according to the ability of the deployed SQL Server. Finally, we can provide your Asset Managers and System Administrators the full information in a centralized and easily accessible way. If you need to collect basic data about your PC, Synexsys is the right choice, as we can populate the collection with interfaces, IP addresses and running processes and with a few clicks start the collection process. Synexsys Inventory LITE Functions: [Detection and collection of entities by SQL Server on the target systems.](#) [Basic data such as interfaces, IP addresses and running processes](#) [Real time collection of data stored in databases, EDBs and SMBs of SQL Server](#) [Mass extraction of database data, EDBs and SMBs](#) [Easy collection of applications running in the target systems](#) [Very low bandwidth requirement](#) [Graphic reports of collected data in accordance with specific needs](#) [Export data to centralized data server, and follow the log book facility](#) [Exported data can be managed through a secure web interface](#) [Simple to use](#) [In-place installation](#) [FREE Highlights of Synexsys LITE:](#) [FREE](#) [Easy and fast installation and configuration](#) [Fast and easy configuration process](#) [You do not need an IT pro to configure the system.](#) [Consists of a very easy to use interface and wizards](#) [Also suitable for advanced configuration](#) [Configure the system by using file-based configuration and web interface](#) [Also you can configure it by using window-based setup and remote services.](#) [The system will be managed by a setup wizard](#)

What's New in the?
