[Experience with the use of the CT-guided Gelfan plaster in the treatment of healing processes in the structure of the ankle joint and foot bone]. With the aim to substantiate a definite pattern of pathophysiological changes in the structure of the foot and ankle joints, the authors are presenting their own experience with the use of CT-guided Gelfan plaster. Forty five patients were examined by the authors. In all cases, the CT-guided Gelfan plaster was used for the treatment of the acute and subacute changes in the structure of foot 570a42141b
