Q: Maclaurin series of inverse function I've got a question about Maclaurin series of inverse function. I was just looking at this video on Maclaurin series and I noticed that depending on the value of the function, the Maclaurin series might not necessarily converge. For instance consider the following argument: Let $f(x)=\sqrt{1+x}$ then the Maclaurin series for f^{-1} is $\$1+\frac{x}{2}+\frac{x^2}{4}+\frac{x^3}{8}+\frac{x^4}{16}+\frac{x^5}{16}+\frac{x^6}{32}+\frac{x^7}{32}+\frac{x^8}{64}+\dots$ plugging $x=1$ in it yields $f^{-1}(1)=1$ which is wrong since $f^{-1}(1)$ is infinite. So I was wondering why when the range of f is finite, then in general, the Maclaurin series has to converge? Thanks in advance. A: You're looking at a textbook example of a domain in which Maclaurin series may not make sense. If the Maclaurin series converges in the domain of f^{-1} then it must converge as well in all the points above its range. In your example you have $x=1$, hence $1=f(1)$

In these days the jigsaw puzzle is a regular mobile game. The interesting thing about 3D jigsaw puzzle game is that you are not assembling the puzzle in a single picture mode, but it is a mobile game. This is how this game works. You are assembling the puzzle by various background images. You can do some colour manipulations to this images. And, in this game, you can assemble the puzzle on non-portable surfaces. The interface is mixed up with 3D puzzle pieces, background, and hint are shown on the screen. We want a game to bring in jigsaw puzzle into the mobile games. The game is based on 3D puzzle construction. For that, as you can see, you need to manipulate pieces to hide it on the plane. The game has also mini-games to play before solving the puzzle. To solve puzzles, it will control with the keyboard and mouse. Or, if you want, you can also simply drag the pieces to assemble the puzzle. I hope you can use your fingers for assembling puzzles as in the real world. The jigsaw puzzles have various difficulties: - In easy levels, you can get almost perfect puzzles. - It will take some time for you to solve the harder levels. - If you need to solve a puzzle in the hard level, you can use hints. - Hints will appear at the lowest level while solving this puzzle. - If you solve the puzzle, the next level will be available. - The game has educational level. - You can play through the education level in order to learn how to solve puzzles. Please give us your feedback if you found any problems. Thanks for your support. Simultaneous mirodenone (isopentenyl pyrophosphate) and triacontanol (C(30) fatty alcohol) synthesis from acetyl coenzyme A and NADH by a genetically engineered Escherichia coli. Mirodenone, a unique sesquiterpene with a carbon skeleton of acetyl coenzyme A and isopentenyl pyrophosphate, was designed, constructed, and synthesized by three steps from acetyl coenzyme A and NADH in an Escherichia coli. The optimized reaction procedure included two steps for the condensation of isopentenyl pyrophosphate with acetyl coenzyme A, and subsequent reduction of d41b202975

What's new in 3D Jigsaw Puzzle Simulator:

2D Jigsaw Puzzle Simulator I have more to share with you but I will do that after some time. Welcome to “The Unreal World”. I encourage you to save this for later so that you can drop by when you are more sleepy. But I came to post about a topic that I have been quite attentive to lately, which just like a restaurant menu, is full of tempting dishes. Which I still need to visit and check whether they are still available or not? I was hungry for some time but it was better that I wait for this. Usually - if there is a spirit in the air, it will seem that some legendary music vengeful spirit might have brought it back from the dead. Pah! Perhaps that is just fake news. Let's make a proper start and I will explain to you what I am interested in. The topic that I am going to discuss is a programming pattern that is actually a critical part of the modern day software development, popularly known as “reactive programming”. Start with a jittering noise. It's a good way to wake up your brain. What is that itches in my brain? What is this piano arrangement? But how come there is no piano here? You can have your favorite music as well if you don't want jitter. It is called “Unreal Engine Belong Mode” which can be found in the same forum. The wonderful author is “DuZefa”. Okokok I will listen to the third pattern. I need to visit my broker (which means that I will need to actually do some work soon). My stomach is still a bit empty but it is time to start with the blog-schedule. Hopefully this time it will be successful. Now I am still hungry. A chicken leg would be suitable. I think it might be a steak. I need a beer to celebrate this new day. The beer would also be delicious. Now I am not very busy for a week and maybe I need some more. Comfort food - my stomach can take it. In addition to this I can also have some research topic. Oh, I forgot to say this line. More or
