In 2018, Autodesk launched two new products AutoCAD LT and AutoCAD LT Essentials. AutoCAD LT is a low-cost, low-capacity CAD package, designed to allow users to produce parametric models. AutoCAD LT Essentials was designed to attract architects and other non-professionals into the 3D space. AutoCAD is primarily sold to customers in North America, South America, Europe, Africa, the Middle East, and Asia. AutoCAD has more than a half-billion dollars in annual

revenue. PC32000 The PC32000 is a microprocessor with an instruction set developed by Motorola for its line of 32-bit Power PC architecture based personal computers. The design is a superset of the older M32000 to cover instruction sets for 32-bit PowerPC applications. The full instruction set supports both big- and little-endian implementations. Overview The instruction set supports a 32-bit address space with no size limits. It includes MMX, MMX2, 3DNOW,

AltiVec, Transmeta Opteron, QuickPath and Integrity extensions. For backwards compatibility, it also has a 32-bit data address space with a memory space of 4 MiB. It has no built-in floating point unit, but supports SSE floating point instructions. A PowerPC 32000 chip has four processors: a single PowerPC 604e (PPC601) or PowerPC 603e (PPC602) that uses the 1.4 GHz UltraSPARC I processor core, two PowerPC 970 processors, and a PowerPC 970MP processor. Each processor is four 256 kB instruction and data caches, and one 256 kB data cache. The system on a chip contains a
